

Topic list interviews

Basic information

1. Can you tell me a little bit about your background and experience in the field of ecoacoustics?

Data lifecycle

2. Can you roughly map out the workflow that you commonly use from data collection to analysis and storage?
3. What kind of tools (platforms, software, etc.) do you use within this workflow?
4. Which standards do you follow within this workflow (e.g. collection standards or metadata standards)?
5. How is your data stored (and do you publish your data on open platforms)?

Knowledge of FAIR

6. To what extent are you familiar with the FAIR principles?
7. Can you tell me how you apply them on your data?
8. Are you involved in or aware of any projects that are working on the FAIRification of ecoacoustic data?

Needs

9. What are the biggest challenges that you face in the management of your data?
10. What are the biggest challenges that you face in terms of data availability and usability?
11. Are there any tools or platforms you wish existed to better support your work in ecoacoustics?
